Assistant Special Agent in Charge

SYNOPSIS

On October 4, 2018, US Environmental Protection Agency - Criminal Investigation Division (EPA-CID) Special Agent [REDACTED] (SA [REDACTED]) received an email from [REDACTED] [REDACTED] Michael Fitzgerald (Fitzgerald), the attorney for the Relator with videos from their IP Camera observing the NY Waterway (NYWW) Workdock.

DETAILS

On October 4, 2018, US EPA-CID SA [REDACTED] received an email from [REDACTED] [REDACTED] Fitzgerald, the attorney for the Relator with videos from their IP Camera observing the NY Waterway (NYWW) Workdock.

The video is taken while it is still dark outside and the camera is unable to pick up any color differences on the water. The videos show activity at the stern of the vessel that has been identified by [REDACTED], the Relator, and the vessel's Automated Information Service (AIS) as the NYWW Ferry BAYONNE. The activity is a crewmember who continues to shine a light at the water near the stern of the vessel. When the flashlight shines on the water, there are brief moments when the water appears to have a greenish tint.

Videos attached.
